

# Instructions for Station 1/5

Station Type: Challenge - Map Interpretation

## **Asia Geo Challenge**

You will be working as a group examining the placards at your station and answering ten questions about South, Southeastern and East Asian geography. The challenge is to figure out which of the placards answer the question and to use them to answer all 10 questions before the period runs out. Use the political map on the back of the instructions for help in identifying the names of any countries in this region.

**Step 1** - In the folders you will find five placards with five types of maps of Asia. Materials Manager pass one of each type to each person on the team.

**Step 2** - Pass out two handouts called "Asia Geo-Challenge":

The handout with questions # 1-6 is glued to **page 112**.

The handout with questions # 7-10 is glued to **page 113**.

**Step 3** - Place your answers in the boxes with the questions.

**Step 4** - When you are done with the questions, place the placards back into their correct folder. Materials Managers will confirm that all maps are back in the correct folder.
