

Notes 1.7 - Regions

Areas that are alike in some ways are called regions.

Regions can be identified in many ways:

● Physical Regions - such as

- continents (South America)
- Sub-Saharan Africa (below the Saharan Desert)
- Gulf Coastal Plain (flat areas along the Gulf)

● Political Regions - such as

- United States
- European Union

● Culture Regions - use common cultural characteristics such as

- language
- religion
- government
- economics
